

# Symphony 104: Minuet

also called “London”, mov. 3

*Joseph Haydn*

*arranged by Paul De Bra for  
accordion quintet or orchestra  
(1, 2, 3, 4, bass, timpani)*

From the popular symphony “London” some movements are more popular than others. The third movement: Minuet and Trio lends itself quite well for accordion orchestra. The arrangement asks for timpani but the bass can at least partially take over, making it possible for a quintet to play it as well.

This work is “moderately” difficult (it does not go very fast but has some longer runs). It uses a high Bb in the third voice but a register change can be used to avoid it, then requiring only standard 41-note piano accordions.
